## PROFESSIONAL SUMMARY

---

Motivated Software Engineering student at the Adventist University of Central Africa, building practical experience through hands-on academic projects in software development, web development, and data analysis. Comfortable working across the stack with programming languages such as Java, Python, PHP, and JavaScript/TypeScript, along with relational databases and standard software architectures (MVC, DAO). Genuinely interested in artificial intelligence, problem-solving, and building well-structured applications, and eager to bring this foundation to an internship or junior developer role.

## TECHNICAL SKILLS

---

**Programming Languages:** Java, Python, C, PHP, JavaScript, TypeScript, SQL, PL/SQL

**Web Development:** HTML, CSS, JavaScript, TypeScript, PHP, XAMPP

**Java & Software Engineering:** Object-Oriented Programming (OOP), JDBC, Hibernate, Java RMI, Java Swing, MVC Architecture, DAO Pattern

**Databases:** MySQL, PostgreSQL, SQL, Database Design, Hibernate ORM

**Python & Data Analysis:** Python, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Data Visualization

**Other:** Data Structures and Algorithms

**Basic Familiarity:** C++, Lua

## ACADEMIC PROJECTS

---

### Electric Bike & E-Scooter Rental Management System

*Technologies: Java, Java Swing, Java RMI, Hibernate, MySQL, MVC, DAO*

- Designed a client-server rental management application using Java RMI for client-server communication, with separate customer and administrator roles supporting authenticated access.
- Implemented vehicle management, rental and return workflows, and payment handling, structured with the MVC pattern and the DAO pattern for clean separation of concerns.
- Used Hibernate on top of MySQL for persistent storage of users, vehicles, rentals, and payment records.

### AUCA Student Portal

*Technologies: PHP, MySQL, HTML, CSS, JavaScript, XAMPP*

- Built a web-based student portal with separate student and administrator functionality, including registration, login, and management of academic information.
- Implemented course registration with prerequisite checks, along with tracking of student balance, failed courses, and timetable/room information.
- Designed and managed the underlying MySQL database to support the portal's academic and administrative features.

### Hospital Appointment Management System

*Technologies: PHP, MySQL, HTML, CSS, JavaScript*

- Developed a web-based application for submitting and managing hospital appointments, integrated with a MySQL database.
- Implemented appointment status management (e.g., pending) to track the progress of each request.

### Hotel Management System

*Technologies: Java, Swing, JDBC/Hibernate, MySQL*

- Built an academic Java desktop application with a Swing graphical user interface for managing client information.
- Used JDBC/Hibernate to connect the interface to a MySQL database for storing and retrieving client and booking data.

### Data Analysis Projects

*Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn*

- Analyzed an Ecommerce Customers dataset, performing data cleaning, exploratory data analysis, and regression analysis to identify patterns in customer behavior.
- Analyzed a Call Detail Record (CDR) dataset, applying data visualization and statistical analysis to interpret usage patterns and draw insights.

### Web Development Projects

*Technologies: HTML, CSS, JavaScript, TypeScript, PHP*

- Completed additional academic web development projects applying HTML, CSS, JavaScript, TypeScript, and PHP to build functional web pages and features.

## EDUCATION

---

### Adventist University of Central Africa (AUCA), Rwanda

Bachelor's Degree in Software Engineering

*2023 – Present*

## CERTIFICATIONS

---

- Cisco Networking Basics — Cisco, September 2024
- Cisco Computer Hardware Basics — Cisco, June 2022

## LANGUAGES

---

English, French

## INTERESTS

---

Artificial Intelligence, Game Development, Software Development, Technology
